Professional Summary

Results-driven Cloud/DevOps Engineer with 6 years of corporate experience in designing, deploying, and managing secure cloud infrastructure on AWS and Azure. Skilled in Terraform automation, cloud hosting environments, Microsoft 365, and infrastructure support. Proven expertise in delivering scalable, cost-optimized, and reliable cloud solutions with a focus on high availability and security. Strong communicator and problem solver, collaborating effectively with cross-functional teams to ensure operational excellence.

Skills:

Cloud Platforms: AWS (EC2, S3, RDS, VPC, IAM, CloudWatch, Route53, CloudTrail), Azure (VMs, Intune, AD, Monitor)

Infrastructure as Code: Terraform (Modules, Remote State, Cloud)

Hosting & MSP: cPanel/WHM, Plesk, DNS Management, SSL, Backup Systems, M365 Administration

CI/CD: Jenkins, GitHub Actions, AWS CodePipeline

Containers: Docker (basic Kubernetes exposure)

Operating Systems: Windows Server (2012–2022), Linux (Ubuntu, CentOS)

Monitoring & Logging: AWS CloudWatch, Datadog, Nagios, PRTG

Scripting: PowerShell, Bash, Python (for automation tasks)

Security: IAM Policies, AWS KMS, Network ACLs, Intune Device Security, Security Groups

Tools: ServiceNow, Confluence, JIRA, GitHub, ITGlue, FreshService

Education:

Bachelor of Engineering (B.E.) – Information Technology (2017 - 2020)
NDMVP'S Kbtcoe, Nashik

Diploma – Information Technology (2014 - 2017)
K. K. Wagh Polytechnic, Nashik

Professional Experience:

Aress Software and Education Technologies Pvt. Ltd., Nashik
Sept 2020 – Present

- Designed and implemented secure and scalable AWS & Azure environments using Terraform and best practices. Automated infrastructure provisioning with modular Terraform, reducing manual setup time by 40%.
- Managed web hosting infrastructure (WHM/cPanel) and optimized server resources for better uptime and client performance.
- Administered Microsoft 365 services under MSP operations — mailbox management, Intune setup, and user onboarding/offboarding.
- Configured and maintained CI/CD pipelines using GitHub Actions for efficient code deployments.
- Monitored infrastructure with Datadog, CloudWatch, and Nagios, improving uptime and alert response time.
- Handled incident management via JIR, ServiceNow, performing root cause analysis and ensuring SLA compliance.
- Supported internal teams with secure access control, encryption management, and environment documentation.
- Provided technical support for cloud infrastructure, backup solutions, and performance optimization.
- Administered the Aurora PostgreSQL database to retrieve/update the customer data

Certifications:

- AWS Certified Solutions Architect – Associate
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft 365 Certified: Fundamentals
- cPanel Professional Certification

Professional Strengths:

- Strong problem-solving and analytical mindset.
- Excellent communication and coordination with cross-functional teams.
- Keen attention to detail with focus on security and compliance.
- Quick learner, adaptable to new technologies and environments.
- Passionate about improving operational efficiency through automation.

Achievements:

- Recognized three times as "Performer of the Month" for excellence in service delivery and problem-solving.
- Awarded as "Employee of the year"
